

SPECTRUM™

Fusion

Stay ahead of the profitability curve
with our new **SPECTRUM** line of feed
ingredients from **Perdue AgriBusiness**

Welcome to the Fusion of quality assurance, fatty acid nutrition, and rumen protection technology.

▲ Uniform particle size ensures that **Spectrum Fusion** delivers results in every bite

SPECTRUM Fusion is the next generation of fatty acid supplements for high producing dairy cattle. The latest research highlights the benefit of specific fatty acid combinations that increase NDF digestibility allowing for more energy corrected milk production. Instead of using raw fatty acid distillates or nonspecific fatty acid streams, **SPECTRUM Fusion** is formulated using enriched fatty acid streams with known fatty acid profiles.

Fig. 1: The effects of different dietary ratios of fatty acids in a supplemental fat blend fed at 1.5% diet DM on energy corrected milk yield. Adapted from de Souza et al. J. Dairy Sci. Vol. 99 (E-Suppl. 1): 620.

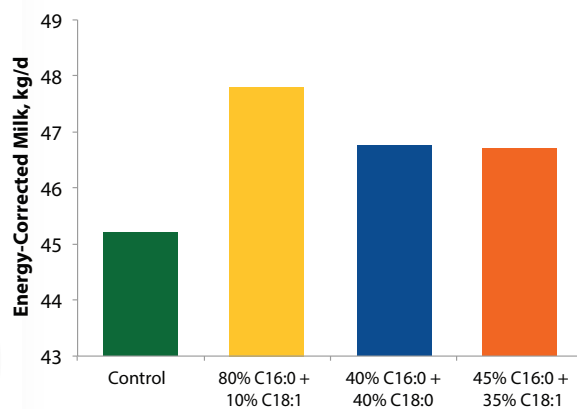

Figure 1 Having the correct fatty acid blend increases energy corrected milk.

Characteristics:

- Research proven fatty acid blend
- Specific fixed formulation
- Uniform particle size
- Separate rumen protection technologies
- Maximizes NDF and fatty acid digestibility

Results:

- A mixture of saturated and unsaturated fatty acids that maximizes energy corrected milk production
- Product consistency guaranteed to deliver repeatable results every time; no more guessing whether your fat supplement is changing
- Proven to mix consistently in a base mix at the feed mill or in the TMR at the farm
- Prilled saturated fatty acids and calcium salts of unsaturated fatty acids supporting consistent post-ruminal delivery of key fatty acids
- Maximizes NDF and fatty acid digestibility leading to increased milk and fat yields

Feeding Directions:

Feed at 1.5% of dry matter intake to high producing dairy cattle, or according to the recommendations of an animal nutritionist. Do not exceed 3% of total dry matter intake.

Guaranteed Analysis: Crude Fat 97.0% min
